## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 42-49, drawn to a method for depositing gold at sites on a substrate, classified in class 436, subclass 518.
- II. Claims 50-76, drawn to a method for assaying presence of a specific substance at sites on a substrate, classified in class 435, subclass 4.
- III. Claims 77-83, drawn to a kit, classified in class 422, subclass 50.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group II does not require the step of forming nucleation centers with a recognition group consisting of molecules or complexes which bind to each other, and a metal particle. The subcombination has separate utility such as depositing gold on a substrate.

Inventions I and III, and also Inventions II and III, are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be

Art Unit: 1641

used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in depositing gold on a substrate that does not have a nucleation center of Inventions I and II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for others, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Goldman on June 13, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Y. Lam whose telephone number is (703) 306-5560. The examiner can normally be reached on M-TH 8-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long V. Le can be reached on (703)305-3399. The fax phone numbers for the organization where this application or proceeding is assigned are (703)308-4242 for regular communications and (703)308-4426 for After Final communications.
